DETAILED ACTION

1. Applicants' amendment filed February 19, 2002 is acknowledged and has been entered. Claims 1-26 have been canceled. New claims 27-82 have been added. Claims 27-82 are now pending in the present application.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 27-43, drawn to a method of determining infection in a human patient.

Group II, claims 44-52, drawn to a kit.

Group III, claims 53-59, drawn to a method of determining infection in a human patient.

Group IV, claims 60-66, drawn to a kit.

Group V, claims 67-73, drawn to a pharmaceutical composition comprising a peptide.

Group VI, claim 74, drawn to a pharmaceutical composition comprising a polynucleotide.

Group VII, claims 75-82, drawn to a method of diagnosing infections in a human.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons set forth above.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Each Group, I-VII, contains claims that recite SEQ 1-11; Applicants should elect a second SEQ ID NO: from SEQ ID NO:2-11.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner: All of the claims correspond to the listed species.

The following claim(s) are generic: claim 27, with respect to SEQ ID NO:1.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the claims recites different species in the form of SEQ ID NO:2-11.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
